CAREER OBJECTIVE

Motivated and results-driven Mechanical Engineering student (N1–N5 complete, currently completing N6) seeking a **Mechanical Engineering Apprenticeship** to complete practical workplace logbook hours toward Trade Test (Red Seal) certification. Eager to apply strong theoretical knowledge in mechanical systems, fluid mechanics, machinery maintenance, and fault diagnosis within a fast-paced workshop environment while contributing effectively to operational safety and productivity.

TECHNICAL STRENGTHS

Core Technical Knowledge:	Mechanical engineering systems, fault finding & diagnostics, preventative maintenance, component assembly & dismantling, hydraulic & pneumatic fundamentals.
Tools & Equipment:	Hand tools, power tools, workshop machinery, precision measuring instruments, diagnostic scanners, torque wrenches, pneumatic tools.
Safety & Compliance:	OHSA / workshop safety protocols, daily equipment inspections, risk assessment, clean workshop housekeeping.
Core Competencies:	Troubleshooting, technical problem solving, fast learner, adaptability, teamwork, time management, attention to detail.
Licensing & Status:	Valid Driver's License Ready to commence workplace logbook training immediately.

WORK EXPERIENCE

Livestock & Agricultural Maintenance Assistant PMC Group	2017 – 2026
- Conducted routine preventative maintenance, pre-operational inspections, and basic fault finding on agricultural machinery, power equipment, and service vehicles. - Utilized hand tools, power tools, and workshop equipment for component assembly and mechanical repairs under strict OHSA health and safety standards. - Supported poultry farming operations, general maintenance, and mechanical troubleshooting to minimize equipment downtime and optimize operational safety.
