PROFESSIONAL SUMMARY

Driven and highly resilient software engineer with a robust foundation in full-cycle software development, advanced end-user computing, and modern technology frameworks. Combines structured academic training from WeThinkCode_ with professional IBM certifications in cybersecurity, AI, and data fundamentals. Proven capacity for technical problem solving, code version control (Git/GitHub), and full-stack project delivery, eager to contribute high performance and adaptability to a progressive technical team.

WORK EXPERIENCE

Software Engineering Student

2021 – 2023

*WeThinkCode_*

- Completed an intensive software development curriculum covering programming logic, systems thinking, and team-based project delivery.
- Developed and deployed full-stack application projects, including a banking demonstration application managed via Git and GitHub.
- Compiled a comprehensive Portfolio of Evidence (POE) mapping practical coding deliverables to NQF Level 5 standards.

EDUCATION AND QUALIFICATIONS

- **Higher National Certificate: Software Engineering (NQF Level 5)** – WeThinkCode_ (2023)
- **Amended Senior Certificate / Grade 12** – St Anthony Education Center (2026)
- **National Certificate: Business Administration Service (NQF Level 4)** – Sanchaa Connection (2019)
- **National Certificate: End-User Computing (NQF Level 3)** – Siyabonga Multi Purpose and Telecentre (2018)

PROFESSIONAL CERTIFICATES (IBM ONLINE)

- Cybersecurity Fundamentals – IBM
- Data Fundamentals – IBM
- Artificial Intelligence (AI) – IBM

CORE SKILLS & COMPETENCIES

Technical Skills

- Software Development Lifecycle (SDLC) & OOP
- Version Control (Git, GitHub) & VS Code
- Fundamental Cybersecurity Protocols
- Data Literacy and Fundamentals
- Technical Problem Solving & Debugging

Administrative & Soft Skills

- Business Administration & Logistics
- Documents and Records Management
- Time Management & Punctuality
- Adaptability and High Resilience
- Strong Verbal & Written Communication
