Professional Summary

A currently enrolled final year BSc student that is proficient in fulfilling her role in the team and company by working towards completing her individual duties as effectively as possible, balancing with professional growth and contributing to a larger organizational goal. The modules adhered led to a greater experience in terms of working with team members as well as individually, effective time management abilities, demonstrating high levels of attention to details while rechecking the work submitted beforehand which I strongly believe has resulted in possessing administrative skills

Professional Experience

Biochemistry II

- Increased level of competency by working in groups
